

## Medical Form

We have done everything possible to protect your puppy from disease, parasites, and illness. Below is a list of what he/she has received, when it was given and what we suggest for the future based on personal opinion, experience and our Veterinarian's recommendations. If you have questions regarding medical care, please call, text or email anytime.

### **D.O.B –**

Vaccinated for canine distemper, adenovirus, parvovirus, parainfluenza (DAP):

Dewormed with Panacur:

Fecal done: \_\_\_\_\_ Results: \_\_\_\_\_

Microchip: NanoChip

### **We ask that your puppy be vaccinated for these things on these days:**

DAP:

Lepto: Discuss with your vet

Bordetella: Discuss with your vet

Rabies:

We recommend deworming with Drontal or Virbantel every 6 months starting \_\_\_\_\_ unless instructed to do so sooner by your veterinarian.

We do not recommend a heartworm control unless you traveling out of state with your dog into a heartworm prevalent area. Please address this with your veterinarian and seek their advice for your area.

I use Revolution Topical, Comfortis oral or Seresto collars for Flea Control.

Please be sure to keep nails trimmed, coat free of matts and burrs and well brushed/combed and clean.
