

Cargo Transport

Choosing to have your puppy flown to you via Plane Cargo can be a stressful time. We do all we can to help the transition go smoothly for both you and your puppy!

What to know:

Your puppy will be dropped off two hours prior to departure and can be picked up 30min - 1 hr after arrival. Your puppy may be more shy than usual or even more rambunctious and active than normal. Be prepared to take your puppy to a safe place to potty as soon as possible. Let him ride home on an adult's lap for the trip home! Your puppy's cinch bag and Snuggle Puppy supplies as well as food etc are taped to the top of the crate. Inside the crate is the empty Snuggle puppy and a toy. Under the bedding you will find your folder containing important documents.

What to bring:

Your ID. There will be no need for payment as that was taken care of in Oregon.! Scissors to cut the zip ties. Two clean towels and a package of wet wipes in case your puppy soiled the crate. A simple leash to take your puppy potty. Alcohol wipes to wipe his feet after he potties in the public grass. A bottle of water to offer fresh water. A passenger or driver so he can ride on someone's lap. A Porky Puff or Bully Stick for chewing on the way home. Address to your Cargo Facility (May not be the airport!)

What now?

Text me a photo once he is safely in your arms! When you get home you can wash and dry the blanket and snuggle puppy if needed. After dry, put the little heart and warm pack inside your snuggle puppy. Review all documents in your folder! Go slow, be patient and snuggle your puppy!
