USING essential oils WITH DOGS

OREGON BORDOODLES

As professional trainers, we are committed to raising each of our puppies with the highest standards possible. Our dogs have grown up to be service dogs, therapy dogs, and as beloved family pets. We are dedicated to ensuring that each family has the right dog for the needs of their family.

Our goal is to have a healthy Mama and puppies from the time of conception. Our mothers and the spaces that they live in are taken care of with non-toxic products and supplements. From the moment they are born each puppy is cared for with love and with these same wellness system supporting products.

We utilize the very best from oils, to supplements, to the cleaners we use to clean their environment. We believe that these tools combined with the world renowned Puppy Culture method creates the crucial foundation your puppy needs to succeed.

I would be remiss if I did not mention the business possibilities in this ebook. When I started using Young Living for my dogs I had ZERO interest in the business side of things. However, their referral program is incredible and because I was so in love with the products I could not help but tell people about them and give them my referral code.

You can use your membership like you use your Costco card, for you and you alone. Young Living is fine with that. However, should you have a friend who wants to know more, or wants to get their own starter kit Young Living will pay you a referral fee.

I had friends that wanted to know more so I shared my referral link. The few became a few more and a few more and I now get to travel on my terms, live a life of freedom, & purpose with abundance. If you could use a little extra or a LOT extra - let's chat. Connect with me through any of the channels below and I'll send you a quick video that explains the process.

What would you do with extra money every month?
