PennHIP Report

Referring Veterinarian: Dr Mark Weber
Email: ashley@newbergvet.com

Clinic Name: Newberg Veterinary Hospital
Clinic Address: 3716 E Portland Rd
Newberg, OR 97132
Phone:
Fax:

Patient Information

Client: Manire, Danielle
Patient Name: Dahlia
Reg. Name:
PennHIP Num: 181199
Species: Canine
Date of Birth: 08 Jan 2022
Sex: Female
Date of Study: 05 Jan 2023
Date of Report: 10 Jan 2023

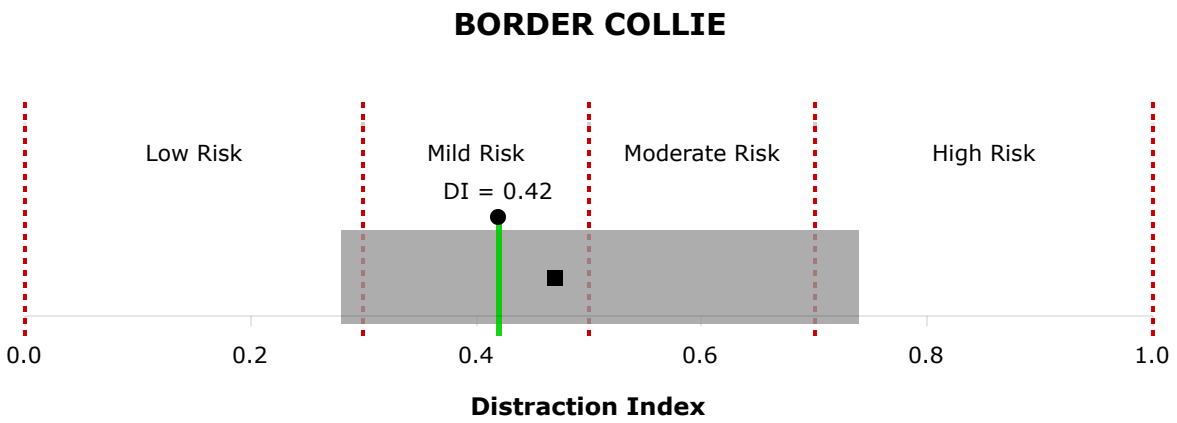
Tattoo Num:
Patient ID: 21333
Registration Num:
Microchip Num: *846*037*280
Breed: BORDER COLLIE
Age: 12 months
Weight: 28.400000000000002
Date Submitted: 09 Jan 2023

Findings

Distraction Index (DI): Right DI = 0.42, Left DI = 0.41.
Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**
Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.42.
OA Risk Category: The DI is between 0.31 and 0.49. This patient is at mild risk for hip OA.
Distraction Index Chart:



BREED STATISTICS: This interpretation is based on a cross-section of 3271 canine patients of the BORDER COLLIE breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.28 - 0.74) for the breed. The breed average DI is 0.47 (solid square). The patient DI is the solid circle (0.42).

SUMMARY: The degree of laxity (DI = 0.42) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a mild risk to develop hip OA. **No radiographic evidence of OA for either hip.**
